DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-10 are generally narrative in form to such an extent that one is unable to ascertain the exact method steps being claimed or those structural limitations which are positively recited which should be given patentable weight. In accordance with CFR 1.75(i) the examiner suggests that each step (or structural limitation) in the claims be separate by a line indent so as to make it clear what the exact method steps (or structural limitations) are.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-10, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Howard USP 6,250,450. Howard discloses a similar invention comprising a chute having a plurality of cascade formations that co-operatively define a plurality of cavities.
